## Altamectin 1.8% EC

**Pesticide composition**: A drem insecticide containing 1.8% Abamectin (w/v) in the form of an emulsifiable concentrate.

**Pesticide effect**: Altamectin 1.8% is an insecticide and a drem that works by contact, is effective and has a long-term residual effect and has the property of penetrating inside the leaf, which leads to better control of insects.

**Pesticide properties**:

**Altamectin 1.8% EC**: An insecticide and a drem that works by contact, is effective and has a long-term residual effect and has the property of penetrating inside the leaf, which leads to better control of insects, especially those that have acquired immunity to other pesticides. And insects that are difficult to control, such as leaf miners and aphids. It is also used to control psylla in agricultural crops.

**Altamectin 1.8% EC**: Can be mixed with most pesticides, but it is recommended to do a simple mixing experiment before generalizing the spraying.

**Altamectin 1.8% EC**: Non-toxic to plants according to the recommended proportions.

**Altamectin 1.8% EC**: May be fatal if swallowed or inhaled.

Usage rate in the following table :

Crops	Pests	Usage rate / 20 L of water	Safety period	Number of sprays in season	Period between sprays
Tomato	Two-pointed sniper Tomato rust sniper Tunnel diggers	9-6 ML	7 DAYS	2 spray at season	28 days

<b>Citrus</b>	<b>Broad sniper Citrus Rust sniper Brown Citrus Rust sniper</b>	<b>5-3 ML</b>	<b>10 days</b>	<b>1 spray at season</b>	
<b>Strawberry</b>	<b>Two-pointed sniper</b>	<b>5 ML</b>	<b>7 days</b>	<b>2 spray at season</b>	<b>14 days</b>
<b>Ornamental plants</b>	<b>Two-pointed sniper</b>	<b>10 ML</b>	<b>7 days</b>	<b>1 spray at season</b>	
<b>Pepper</b>	<b>Two-pointed sniper</b>	<b>6 ML</b>	<b>3 days</b>	<b>2 spray at season</b>	<b>28 days</b>
