KONT FASTENERS PRODUCT

BORONEX

- ❖ A soluble fertilizer that meets the plant's needs for boron and molybdenum
- ❖ A soluble fertilizer containing boron and molybdenum in a form that facilitates the absorption of these two elements.
- ❖ It helps increase flower setting through its effect in stimulating pollen formation and flower fertility.
- ❖ It regulates and balances nitrogen in the leaves, helps convert it into protein, and balances osmotic pressure.

BORONEX Compositions:

MATERIAL	COD	RATEIO	(Weight/Volume)
BORON	B	10%	Weight/Volume
Molybdenum	MO	0.5%	Weight/Volume
Zinc	ZN	15%	Weight/Volume

Usage rates are in the following table

Crop	Usage and timing
Uncovered vegetables	Before flowering begins, 75-100 gm / 200 liters of water, and repeat once every 3 weeks after fruiting.
Protect vegetables	Before flowering, 20-75 gm/200 liters of water and repeated once every two or three weeks.
Apples, almonds and grapes	Before flowers open, 75-100 gm/200 liters of water, and repeat once every 3 weeks when fruit sets.
Field Crops	After spawning and cutting, 1-1.5 kg per acre for one time

Packing : 500 mg - 1 kg
