## Glanew seet 48% SL

**Pesticide composition**: Herbicide containing 48% glyphosate (w/v) in the form of a soluble concentrate.

**Pesticide effect**: A non-specialized, systemic herbicide that is absorbed through plant leaves and moves quickly within plant tissues.

**Pesticide properties**:

**Glanew seet 48%**: A non-specialized, systemic herbicide that leaves no residual effect. It is used after germination.

**Glanew seet 48%**: It fights weeds and weeds that need to be eradicated while they are in their early stages (green and at the peak of their growth activity). As for annuals, glyphosate pesticide eliminates them at all stages.

**Glanew seet 48%**: A pesticide that has no residual effect in the soil as it breaks down upon contact with the soil surface and is low in toxicity to mammals.

**Glanew seet 48%**: Do not mix the pesticide with other pesticides.

**Glanew seet 48%:** Harmful if swallowed or inhaled. Causes temporary damage to the eyes. Toxic to aquatic organisms.

The percentage of usage is in the following table:

Main Crops	Dosage	Number of spraying times	PHI days
To combat perennial weeds Such as grass and alfalfa	400- 600 ml/D	2	7 days
to combat annual weeds Such as blackberries, blackberries, nettles, hibiscus, and chrysanthemums	400-200 ml /D	1	7 days
herbaceous shrubs	600-700 ml/D	2	7 days
