## HIGH POTASH FERTILIZERS

### Hi-K 0-33-42

- ❖ A new generation of liquid based fertilizers, with a low salinity index.
- ❖ Concentrated liquid fertilizer consisting of dipotassium phosphate
- ❖ It is characterized by its rapid transport within plant parts and it is quickly absorbed.
- ❖ Manufactured using a complete and stable reaction method, which does not leave any residue.

### Hi-K COMPOSITIONS :

MATERIAL	COD	RATIO	(Weight/Volume)
Phosphorus	P2O5	33%	Weight/Volume
Potash	K2O	42%	Weight/Volume

### Usage rates are in the following table

crop	Timing	Through soil/donum	Spray on the leaves per 1000 liters of water
Potatoes	Three weeks after germination, repeat it 3 times a week	1.5-2.5 liter	2.000-1.500 liter
Protected and uncovered vegetables	Before the flowering stage, it is distributed until the end of the season within an integrated fertilization program	2-1 liter	1.750 – 1.250 liter
Apples and almonds	Before the flow of the juice or spring fertilization, and repeated twice, even before the harvest	2-3 liter	2.500-1750 liter

<b>Field crops</b>	<b>Before the unloading stage and until the start of the operations</b>	<b>1.5-1 liter</b>	<b>1.750-1.250 liter</b>
<b>Banana</b>	<b>Once growth and branching begin, once every two weeks until the harvest begins</b>	<b>2-3 liter</b>	<b>.....</b>
<b>Grapes</b>	<b>When growth begins and repeated before harvesting</b>	<b>2-3 liter</b>	<b>1.750- 1.2520 liter</b>
<b>Strawberry</b>	<b>batch and repeated throughout the fruiting succession stage</b>	<b>1.5-1 liter</b>	<b>1.500 – 1.000 liter</b>

**Packing** : 1liter – 5 liter – 20 liter
