HIH PHOSPHOROUS FERTILIZERS

PHOSCO PLUS 16-46-0

- ❖ A multi-purpose fertilizer and preventive preparation, which is a liquid phosphorus fertilizer.
- ❖ A fast-acting phosphorus fertilizer due to its ease of absorption and its ability to move elastically within plant tissues.
- ❖ Ideal for the first growth stage to provide a strong root system and prepare the plant for flowering.
- ❖ It enables the plant to reach the potential for growth and production

PHOSCO PLUS COPOSITIONS :

Material	COD	Ratio	Weight / Volume
Nitrogen	N	16%	Weight / Volume
phosphor	P2O5	46%	Weight / Volume

Usage rates are in the following table

CROP	Usage rate and timing
uncovered vegetables	Using irrigation systems: 3-5 liters/ha immediately after planting and repeated once a month during the season. Spraying on the leaves: 250-300 cm ³ /200 liters of water once every three weeks.
Field Crops	Using irrigation systems: 3-5 liters/ha immediately after planting and repeated once a month during the season. Spraying on the leaves: 250-300 cm ³ /200 liters of water once a month.

<p style="text-align: center;">Fruit trees</p>	<p>Using irrigation systems: 4-6 liters/ha before spring growth and repeated once a month. Spraying on the leaves: 250-300 cm³/200 liters of water once every three weeks.</p>
<p style="text-align: center;">Vegetables inside greenhouses</p>	<p>Using irrigation systems: 5 liters / hectare with the first irrigation and repeated once a month. Spraying on the leaves: 250-300 cm³ / 200 liters of water once every three weeks.</p>
<p style="text-align: center;">Citrus fruits and olives</p>	<p>Using irrigation systems: 5 liters / hectare at the beginning of spring growth and before flowering, spraying on the leaves: 250-300 cm³ / 200 liters of water once every three weeks.</p>
<p style="text-align: center;">Potatoes</p>	<p>Using irrigation systems: 10 liters / hectare after complete germination and repeated after two weeks. Spraying on the leaves: 250-300 cm³ / 200 liters of water once every two weeks.</p>

PACKING : 1 Liter – 5 liter – 10 liter – 20 liter
